<u>Experience Records</u>

February 2018 – Present Time
DriveNow (drive-now.com)

Position: React and Go developer

As a developer of huge BMW Concern DriveNow that until July 2018 was a part of Sixt Concern, I am responsible for corporate site drive-now.com, its frontend part (written in React + Redux, NodeJS); Middle-layer (written in Go) that provides API for content, caching and external request management system; and Drupal that keep all content. Besides this, I am also developing a web-shared project that holds all common react components for all DriveNow projects and Admin Tool that manage all DriveNow projects, fixing bugs, do refactoring, implementing new features and new technologies in project stack.

December 2015 – February 2018
Dukascopy Swiss Forex Bank And Marketplace (dukascopy.com)

Position: Full-stack web developer

For this period of my work-life, I was responsible for client-side widgets that collect process and show information about Forex trades in real time on web pages. We used Google Closure library with Ant utility for compiling our Javascript code in one minimized bundle for using on web pages. On server-side, I was developing a widget server written on Laravel that used MySQL database.

November 2015 – December 2016
Fironet
Project Trainer (trener.ua)

Position: Full-stack web developer, Project Architect

Developing from scratch of new web project "Trainer" - sport coach search. The project is available in 8 languages for 7 countries. I was responsible for the architecture of the project, choosing of project stack technologies, frontend and backend sides, database, settings of production Linux-nginx server and deploy. At one period, I was leading junior college and conducted job interviews.

You can also find some videos about this project here:

·   https://www.youtube.com/embed/cfzVjXyNFfo
·   https://www.youtube.com/embed/6lQYT56Bu6U
·   https://www.youtube.com/embed/BdMkJnWwcUU

As a part of Lithuanian-side team, since July 2015, in parallel with my main project "Trainer", I also started to develop with my Lithuanian-side colleges from scratch a new ambitious b2b project – cargo uber. The technologies used: NodeJS, Express, SailsJS, Vue, Mysql, Sequelize, Mocha, Jasmine, and others.

May 2015 – November 2015
Adphone (adphone.biz)

Position: Middle Full-stack web developer

Responsibilities:

· development of new functionality and refactoring (Yii/Yii2)
· development and decoration of web pages
· development of client-side functionality
· development of server-side part
· database support (PostgreSQL, Redis).

July 2012 - April 2015
Freelance projects

Position: Middle Full-stack web developer

In this period, I was working on not complicated e-shop sites (from scratch to production versions) and managed to do other freelance orders such us: develop PSD to HTML/CSS/JS, create backend side with REST API, refactoring, fixing bugs etc.

September 2008 - May 2015
Parus Corporation (parus.ua)

Position: Technical writer and tester

Responsibilities:

· development of different documentation and guides for users and administrators
· testing of modules developed with Java and Delphi
